

STOCKLEY PARK, UXBRIDGE

ASME supplied and installed 60T of temporary steel work to aid in the refurbishment at Stockley Park.

The project incorporated an extension to existing mezzanine floors as well as refurbishing the staircases from ground floor to level 2, resulting in two Cantilever feature staircases, with hand railing, balustrading and steel treads with a stone finish all supplied and installed by **ASME**.

Contract value: £390,000

Location: West Drayton

Duration: 6 Months
