

PROJECT ORIANA

ASME supplied and installed internal and external facade retentions with tie systems to buildings 36, 40-42 and 48 Oxford Street. The works had to be completed over Christmas and at night using a crane for public safety due to high pedestrian traffic during the day.

Contract value: £335,000

Location: Oxford Street building No.36, 40-42 & 48, London

Duration: 12 months
